

# DIVE GUIDE:

## How to filter information using the "Explore Data" tool

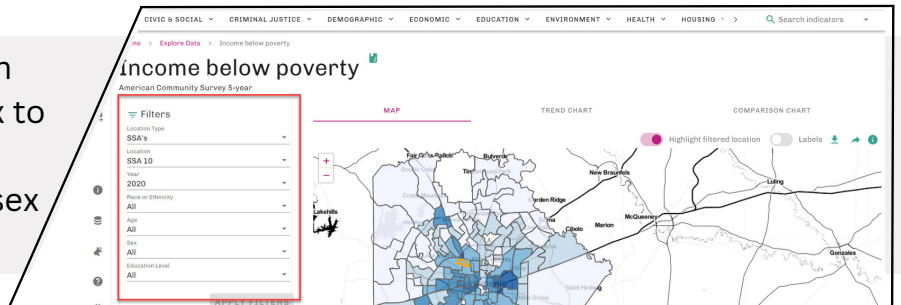

- 1 Start on the "Explore Data" tool and choose an *indicator* from either (A) the featured list, (B) the drop-down menus at the top or (C) through the search bar.

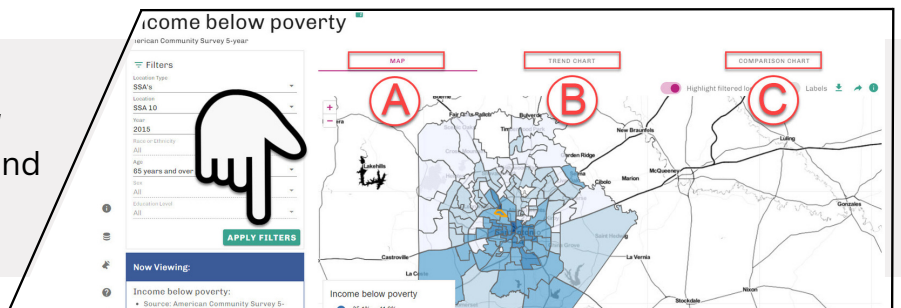

- 2 Use the "Filters" box to choose a *location type* and select a location to explore

- 3 Information can be filtered down further by using the "Filters" box to select a specific year and/or *subgroups* (race/ethnicity, age, sex or education level).

- 4 Click on "Apply Filters" to start exploring each of the three *data visualizations* (A) "Map", (B) "Trend Chart", and (C) "Comparison Chart".

#protip

Use the "Comparison Chart" to see different *subgroups* side-by-side. Note: the bars on the chart will appear in the order that you clicked on them in the drop-down menu.
